

Trawl Camera

Up to 26 hrs recording

Min. 1000 m.

Charging: max. 5 hrs

Bringing the seabed to the bridge

Analyzing trawl action for optimal efficiency.

Years ago, trawler captains began adopting advanced instrumentation to optimize their fishing effort. Even with all their modern technology, captains knew that there was a big gap between what they thought was happening deep in the sea and what was actually happening. Until now.

Five years ago, we began to develop an underwater camera and lighting system that could truly assist the trawler captain to analyze trawl action and thus make better, more informed decisions about future trawl deployments that could optimize trawl efficiency and increase their catch.

Today, we have a proven, quality product. Tested and re-tested to meet the demands of harsh underwater conditions, our rugged TrawlCamera and LED lighting system is designed to provide the detailed knowledge the trawler captain needs to ensure optimal results. We are very proud to offer our advanced TrawlCamera system, a product line that truly reflects years of maritime experience and exhaustive, focused research and development.

Remote Control

The beauty of simplicity defined. Just 6 buttons control 2 high-tech cameras and 3 LED light systems.

Light Unit

With the lights separate from the camera, you have more possibilities to light up specific areas to be recorded from a distance.

LED Light Unit

- High-efficiency LED lights
- Projection angle: 90° adjustable
- Lithium battery
- Separate and adjustable light units
- Rugged, protective housing
- Depth rating ca. 1000m

HD Camera Unit

- Recording: 30-60 fps with 480-1.080p
- Recording time: 4 to 8 hours
- Image: Full HD quality
- Video file format: MPEG4
- Recording view angle: max. 170°
- Projection angle: 90° adjustable
- USB plug for easy transfer of video
- Rugged protective housing
- Depth rating: ca. 1000m

Lowlux Camera + LED Light

- Recording time: up to 26 hours
- 0.003 lux sensitive lens
- Black-white recording
- Video file format: MPEG4
- Projection angle: 90° adjustable
- Low-weight, compact and flow-dynamic design
- Rugged protective housing
- Depth rating ca. 1000m

Accessories

Handy, wireless remote control

Standard MPEG4 files
Suitable for both Mac and PC

Protective case for easy transport and storage
