

The Solo X Subsea LED Light (SLL) is a full ocean rated, ultra compact subsea LED light designed for use with the Solo X Autonomous Recording Camera (ARC). The SLL is extremely efficient, producing 125 lumens per watt with a maximum output of 750 lumens at 6000k. Although optimized for use with the Solo X ARC, the SLL has a standard subsea connector and can interface with most subsea systems.

Specifications

Depth Rating	6000 meters
Housing	Titanium, 1.1" Diameter x 2.75" long (excluding connector)
Viewport	Sapphire
Weight	0.4 lbs in air; 0.3 lbs in water
Electrical	8-24VDC ~1A, PWM dimmable
Connector	SUBCONN MCBH3M
